

Expense Management

Don't risk throwing your money away.
Enforce policy and reduce your expenses bill.

Research has proved that the cost of processing expense claims in-house can account for up to 46% of your indirect expense costs. Some companies are paying as much as £45 to process a single claim.

In another survey, one in ten people admitted they often claim more than they should on their expenses. Ceridian's Expense Management Solution helps you reduce your expenses bill and enforce your company policy, both preventing fraud and ensuring your employees' claims are settled promptly.

Benefits

Improved employee and client satisfaction

- Settle claims more quickly, increasing employee engagement
- Pay directly to employees' bank accounts activities with one single login
- Pass on costs to clients or partners more efficiently

Significant cost efficiencies

- Recover VAT more promptly and efficiently
- Manage costs and reduce workload by removing manually intensive paper processing and storage
- Ceridian Service Centre makes costs manageable

Clear compliance and audit

- Pinpoint inconsistencies and enforce your claims policy
- Identify habitual spending patterns and structure procurement accordingly thanks to enhanced reporting and analysis

Expense Management can be purchased either alongside the HRevolution suite of on-demand modules or as a stand-alone solution.

This solution has allowed us to identify rogue claims and spending patterns, helping us bring costs down significantly.

Finance Director

Our solution enables line managers to sign off claims more quickly, and flag any claims that do not fit company policy. Our service centre will check the claims submitted, and organise payment as appropriate, ensuring that this process is no longer a drain on your internal resources.
